PEACE OF MIND FOR YOU AND YOUR CUSTOMERS

Our infrastructure is hosted in a **fail-safe PCI level 1 environments in both the USA and Europe**. This means we conform to yearly on-site reviews by an external auditor and a network scan by an industry approved scanning vendor. We can reduce your PCI DSS burden by removing the need for card holder data to enter your systems while still providing you with sufficient tokenized information to fully serve your customers and analyze sales.

Our solution is **PCI Point-to-Point-Encryption (P2PE)** validated and listed whilst our payment terminals provide SRED functionality and conform to PCI PTS 5.x standards.

THE FIRST CHOICE FOR LEADING HOSPITALITY BRANDS

Our impressive list of clients includes the leading global hotel brands where we offer flexible integrated payments with specialist functionality and reporting across multiple channels.

As you personalize your guest services with digital apps, our universal payment gateway is able to process transactions and tokenize the data for your PMS thereby also enhancing your PCI security.

BOOKING

- **Cross channel tokenization** of sensitive card data for secure handling of pre-auths.
- **Online website and in-app payment** pre-authorization and acceptance.
- **Late charge and no show payment functionality.**
- **Telephone and email payment acceptance.**

RESTAURANT & BAR

- **Pay@Table** management of bills enables quick recall of all open tabs.
- **Itemized bill** at terminal & Split bill capability enhances service and saves time.
- **Pay@Counter** solution with configurable offline capability.
- **Latest mPOS web** based solutions integrated to iOS and/or Android tablet devices.

CHECK-IN AND CHECK-OUT

- **Pre-auth cancellation tool** avoids over commitment of guest payment card funds.
- **Top up & fast track check-out functionality** on original card.
- **Pay in currency of choice** with Dynamic Currency Conversion.
- **In-app payment** capability supports mobile device eCheck-in.

SOLUTION TYPE

Pay@Reception PMS	Choose from either a portable or countertop device for added flex-ibility. Both P2PE options provide complete integration to your Hotel PMS.
PayonMove mPOS	Personalized assisted selling, on the restaurant floor or guest room. Used via a discreet Verifone e355 mPOS terminal paired to a tablet.
Pay@Table POS	Enhance the dining experience with a complete table service including split bill capability, tip functionality and recall of open bills.
Pay@Counter POS	Fast, reliable and secure. With a choice of legacy and next generation devices, our wired or wireless P2PE Pay@Counter is the ideal solution for the quick service industry. Offline capability ensures continued trading in the event of network failure.
Pay Online	A choice of 3DS fully hosted or integrated payment pages ensure your online payments are covered. Card on file and in-app payments are all fully supported.
Pay via e-link	Send payment requests directly via email or text message with a secure URL link. The customized payment page is fully hosted by 3C Payment removing any security burdens.

> For the most current list of certified 3C Products, please contact info@3CPayment.com.

PMS INTEGRATIONS

Our wide range of strategic partnerships with the world’s leading PMS providers, trusted by top hotels around the Globe, makes us the ideal choice for your integrated Hospitality payment solution.

A selection of our Hospitality integrators includes:

ORACLE PLATINUM PARTNER

3C Payment has enjoyed a long and **successful partnership with Oracle spanning over 30 years**. During this time, leading hospitality brands have benefited from a feature rich solution thanks to 3C products integrated with **Oracle PMS/POS systems**.

Our Oracle validations are as follows:

SOLUTION TYPE	ORACLE VALIDATION
Pay@Counter POS	OPI 6.2 for Symphony 2 x & RES 5 x

3C Payment's integrated solution with Oracle Opera PMS has vastly improved the check-out and check-in process in Marriott Hotels. We are all very happy with the improved security and efficiency which has come from implementing the 3C solution in our region, and our guests now enjoy better customer service.

Working closely with 3C Payment has enabled us to improve the payment experience for our both our staff and customers while becoming fully EMV compliant. We were able to implement Pay@Table features that have proved a huge time-saver. Only 3C Payment was able to provide everything we need in a Hospitality Solution all through one provider.

3C Payment has been a strategic partner of Hyatt Hotels in Dubai for more than a decade, helping us reach our goal of efficient credit card payments by our guests while maintaining a secure and effective back of house reconciliation. We look forward to expanding our payments systems with 3C Payment as they continue to bring new products to the market.

TRANSFORM YOUR FOOD AND BEVERAGE EXPERIENCE

Diners expect quality, service and a great experience, right through to how they pay. Whether you offer a quick Pay@Counter service or full Pay@Table service, using PCI Point-to-Point-Encryption (P2PE) validated terminals, or create new app-based dining experiences, our fast, secure, flexible solutions are a perfect fit for restaurants, coffee shops and bars.

ENHANCED PAY@TABLE EXPERIENCE

- **Itemized bill** at terminal enhances service and saves time.
- **Split bill** capability allows diners to easily share the cost of their meal.
- **The latest mPOS web-based** solutions integrated on iOS and/or Android tablet devices for service anywhere.
- **In-app payment** supports the latest digital customer experience solutions.

QUICK SERVICE PAY@COUNTER

- **A wide range** of contactless leading brand enabled terminals.
- **Online pin** for higher value mobile NFC payments, including Apple Pay.
- **Scalable** across international company-owned and franchised operations.
- **Offline capability** with flexible configurations that allow for continuous trading in the event of a network failure.

3C Payment were there to support Max Burgers all the way through the project when we deployed the 3C POS Oracle OPI solution in our new restaurants in Poland. From initial scoping to roll out, 3C Payment has been there to support us, and understands the requirements of the quick service industry. Their technical skills and the support provided by them, combined with their products and integration options has been of great value. The result for us has been a smooth onboarding, deployment and support process providing a seamless standardized payment solution to our customers and in our restaurants. We're seeing the partnership with 3C Payment as a strategic choice of vendor in our ongoing expansion.

Caffè Nero can always count on 3C Payment to provide a fast, resilient solution and professional support, as we now install into our fifth new country with them in Sweden. 3C Payment is a key partner for us as we continue to deliver the latest P2PE payments solutions to our customers.

Caffè Nero were very impressed with the professionalism of the 3C team, from scoping the proof of concept to the full roll-out. Finding and quickly deploying a reliable and fast solution was a top priority for us. 3C really understood this and working with a partner who are so passionate about delivering quality makes a real difference.

LEADING THE WAY IN TRANSFORMING CASHLESS PAYMENTS ACROSS THE PARKING INDUSTRY

With a rich history in providing cost-effective integrations for off-street, on-street, and card-in/card-out products, 3C Payment's cashless parking solutions can be deployed in over 40 countries worldwide.

SELF-SERVICE TERMINALS

- **Fully integrated EMV unattended terminals** with CHIP&PIN, CHIP (NoCVM) and contactless configurations.
- **PCI-PTS 4.x terminal** range with full SRED and **PA-DSS certified terminal application**.
- **Transparent mode for proprietary cards** enables service differentiation.
- **Proactive terminal management system** supports continuous operation.

FLEXIBLE DEPLOYMENT

- **Off-street and on-street parking solutions.**
- **Simple card-in/card-out deployments** mean no lost tickets.
- **Motorway and road toll** deployment capability.
- **Secure card-on-file service** for a simplified payment experience.

OMNI-CHANNEL OPTIONS

- **Online and in-app payments** supported with 3D Secure, AVS & CVV fraud protection.
- **Card and/or transaction tokenization** allows secure handling of payment card data and a simplified payment experience for returning customers.
- **Technical & commercial expertise** from installation, to go live and beyond with continual monitoring of our customers' satisfaction.

PARKING INTEGRATIONS

3C Payment works with all the major players in the Parking industry to provide you with a fully integrated solution. The onboarding process is simple, and there is no additional hardware to install onsite or at Pay Stations. The 3C Solution can be deployed with the following Integrators:

UK ALL-IN-ONE SOLUTION

- **PA-DSS certified terminal application** with Point-to-Point Encryption (P2PE) validation.

COMPLETE CONTEXTUAL COMMERCE

3C Digital powers seamless digital customer journeys by unifying services and data through an enhanced enterprise gateway. 3C Digital leverages 30 years of integrated payments experience to bring 3rd party enterprise applications together and to create unique ways of identifying, understanding and rewarding your customers.

The 3C enterprise and payment gateways connect to multiple applications through standardized APIs. Payment data from multiple channels is integrated and linked to customer profiles to harness business intelligence data for a complete contextual commerce solution.

CONNECTING ENTERPRISES

Across multiple industries, Enterprise Applications are transforming the digital experience bringing an enhanced service offering for the consumer and new revenue streams for the merchant.

Payment is key part of every customer interaction and through our proprietary software 3C Digital is able to link tokenized payment data to customer profiles and then through simple integrations into services such as our in-house developed Payment Wallet or your existing CRM system.

This could provide the merchant with enhanced Business Intelligence data such as whether customers which you think are single-visitors are actually purchasing on multiple occasions and through multiple channels.

SIMPLIFIED PAYMENT INTERACTION

- **Card On File Digital Payment Wallet** optimized for IOS/Android & Windows.
- **Seamless Point of Interaction** across all payment channels.
- **Through Enterprise Gateway** connects into required.
- **Enterprise Applications.**
- **Loyalty scheme and reward redemption** fully supported.

PERSONALISED TRANSACTION DATA

- **Personalised transaction data** showing who has paid for what goods/services.
- **Location and timing** completes the who, what, when, where complete picture.
- **Through Enterprise Gateway** transaction basket level detail can be harvested.
- **Data can be used for CRM activity** with more personalized targeted marketing.

TRACK BUSINESS PERFORMANCE WITH 3C PORTAL

We understand that reconciliation of your payments is a crucial aspect to running your business and monitoring cash flow. Our proprietary web portal provides your business with the tools you need to take full control of your transactions via one central online system.

View real time transaction data, download reconciliation reports by revenue centre, manage payments & receipt printing and much more besides.
